GUIDANCE

Symbol	Description
✓	Fully Tested and Mass production
T/A	Sample Tested and Applicable, and requires mass production verification.
S/A	Sample Tested and Applicable, but there is a risk of small margins or others that require mass production to validation.
N/A	Not Applicable
Empty	Not be evaluated

- ◆ Rockchip only validates limited pieces of each sample from vendors and has no mass production experience with the DDR products on this list, so we do not guarantee any DDR quality provided to customers by vendors. Customers are solely responsible for the validating and testing DDR products ensure such product meets applicable standards and any safety, security or other requirements.
- ◆ Please copy the Rockchip reference design model of DRAM area PCB Layout directly without any modification and follow the PCB layout rules from Rockchip. Contact information: fae@rock-chips.com
- ◆ The DRAM Part Number usually consists of two parts divided by '-', the first part contains memory type, density, organization, package, and the second part usually means data rate. It should be noticed that some vendors like ESMT, RAYSON, CXMT, BIWIN, Kingston, Foresee, Goldkey, the second part contains other important information. We don't care about the part represented of data rate.
- ◆ Rockchip platform can support all the chips that match the first part of Part Number which marks '✓', 'T/A' or 'S/A', and do not need to care the second part. If you want your system running more effective, you may need to find out the exact data rate in DRAM datasheet and config in kernel menuconfig.
- ◆ Every times update will be highlighted by yellow.
- ◆ For DDR products on this list, except for specific products marked with application note, they can be used without any software modification.
- ◆ For DDR products on this list, each platform corresponds to each testing separately and the test results of different platforms CANNOT BE REFERENCED.

◆Application Note:

[1] Because lack of Address pin A15 in package, following SoCs do not support the 512M*8 DDR3: RK2906-6, RK2906-8, RK3066.

[2] Only support for RK3128.

[3] The DRAM's VDD and VDDQ should powered by 1.5V when it used on these SoCs.

[4] It can work stably on RK3399 with loader version **rk3399_ddr_XXXMHz_v1.22.bin** and trust version **rk3399_bl31_v1.28.elf**, or the later version than all above. On RK3399pro, loader should be updated to **rk3399pro_ddr_XXXMHz_v1.22.bin**, trust version should be updated to **rk3399pro_bl31_v1.28.elf**. Or the later version than all above.

[5] Only after week code 1937 (means 2019, week 37th) can be used, the product with early week code may cause system crash or unstable.

week code

[6] The DDR must be boot from 400MHz, please use **XXXX_ddr_400MHz_vX.XX.bin** to merge loader.

[7] On RK3568/RK3566, loader should be updated to **rk3568_ddr_XXXMHz_v1.09.bin** / **rk3566_ddr_XXXMHz_v1.09.bin** or later version.

[8] Only after week code **2101** (means 2021, week 01th) can be used, the product with early week code may cause system crash or unstable.

week code

[9] Only after week code **2118** (the third row, first four numbers means 2021, week 18th) can be used, the product with early week code may cause system crash or unstable.

week code

[10] Only after week code **022** (the fourth row, first three numbers means 2020, week 22th) can be used, the product with early week code may cause system crash or unstable.

week code

[11] For LPDDR4 and LPDDR4X unified product, platform only approve LPDDR4 mode, not guarantee LPDDR4X mode can work stably. So VDDQ must provide 1.1V not 0.6V.

[12] For LPDDR4X mode, the DDR bin need update to V1.13 or later version on RK3568 and RK3566.

[13] Only after week code **201** (the fourth row, first three numbers means 2022, week 2nd) can be used, the product with early week code may cause crash.

week code

[14] At the speed of 4266Mbps, it exists unfixable issues. The maximum frequency of this product is limited to 3733.

[15] On RV1126/RV1109, the performance of LPDDR4/LPDDR4X is not enough, please use it after evaluation.

[16] It can't work normally between 400MHz-625MHz and DTS cannot use this frequency band.

[17] On RK3588, the DDR bin should be updated to **rk3588_ddr_lp4_2112MHz_lp5_2736MHz_v1.10.bin** or later version, the bl31 should be updated to **rk3588_bl31_v1.37.elf** or later version.

[18] We tested samples like below, the left picture below may showed a boot error and the right picture below passes the test.

FAIL

PASS

[19] The DDR bin need update to V1.04 or later version on RK3576.

[20] Products produced only after week code 2328 (picture below the third row, the last four numbers means 2024, week 11th) are marked as S/A. Products produced before week code 2328 are marked as N/A. There is a problem with using the product before the 28th week in the year 2023 in the client application, and it cannot be worked.

week code

[21] Please use the template which DDR3_A15 has a link to the DDR chip.

[22] The auto self-refresh function, frequency conversion feature, and standby wake-up function need to be disabled before use. See <https://redmine.rock-chips.com/boards/6/topics/274>

[23] Products produced with week code 2333, 2409, 2417, 2419, 2427, 2431 (picture below the third row, the first four numbers means 2023, week 33rd) are non-compliant with requirements.

week code

[24] Please update the ddr.bin to v1.23 or the later version, **the CA_ODT pin of the DDR component must be pulled up to VDD2, which need modify PCB layout.**

[25] On RK3588, the DDR bin should be updated to rk3588_ddr_lp4_2112MHz_lp5_2736MHz_v1.18.bin or later version, on RK3576 the DDR bin should be updated to rk3576_ddr_lp4_2112MHz_lp5_2736MHz_v1.06.bin or later version.

[26] For some DDR products whose frequencies are lower than the maximum frequency of the platform, it is necessary to modify the frequency to a matching one by yourself. Refer to "修改DDR bin 文件" in the "Rockchip_Developer_Guide_DDR_CN" or "Modify the DDR bin file" in "Rockchip_Developer_Guide_DDR_EN".

[27] If use K3PE0E000A-XGC2, RZQ needs to be changed to NC.

[28] If use K3PE0E000M-XGC2, RZQ needs to be changed to 150ohm.

[29] For 256M16 DRAM on RK3066 and RK31xx platforms, fixed-frequency related patches must be applied. Additionally, strict adherence to our PCB layout requirements is mandatory due to high demands on reference plane integrity in the PCB design.

[30] NT5AD512M16C4-JR (Specific Version) has been validated and passed all tests. However, legacy production lots exhibit known issues. For distinguishing Validated Lots (Specifies the version has passed qualification tests), please contact Nanya Technology directly.

[31] On RK3576, the DDR bin should be updated to rk3576_ddr_lp4_2112MHz_lp5_2736MHz_v1.10.bin or later version.

◆ Revision History

Revision No.	History	Date
2.00	ORG.	2012.12.24
2.42	Add some supporting messages, switch column order of product name.	2020.03.30
2.43	Add some supporting messages	2020.06.16
2.44	Add some supporting messages, modify H9HCNNNBPUMLHR, H9CCNNN8JTMLAR, H9CKNNNBPTMRLR, H9CKNNNCPTMRPR to N/A. Add "Product Status".	2020.09.02
2.45	Add some supporting messages, change the order of manufacture.	2020.11.17
2.49	Modify T/A of K4U8E3S4AD-MG**, NT6AP256T32AV, NT6AP512T32AV to N/A on RV1126/RV1109, fill Samsung and Nanya LPDDR4X on RV1126/RV1109 with N/A.	2021.07.23
2.50	Add some supporting messages, add note [8][9][10][11].	2021.10.22
2.51	Add some supporting messages	2022.01.17
2.52	Add some supporting messages, change note [12][13].	2022.04.01
2.53	Add some supporting messages, add note [14], modify T/A of K4U6E3S4AA-MG**, K4UHE3D4AB-MG**, K4UBE3D4AA-MG** to N/A on RK3588, modify T/A of NCLDXC1MJ512M32, FLXC2002G-N2, RS512M32LM4D2BDS-53BT to N/A on RK3399, modify T/A of FLXC4004G-26, GE8062666ND to N/A on RK3568.	2022.05.30
2.54	Add note [15][16], change note [4], modify T/A of M15T1G1664A-DEBG2C to N/A on RV1126/RV1109, T/A of RS2G32LF4D4BDT-53BT to N/A on RK3588.	2022.08.18
2.55	Change T/A of H9HCNNNBKUMLXR to N/A on RK3399, T/A of EM6HC16EWBH-09H to N/A on all platforms. Delete parts of verison history.	2022.12.05
2.56	Change T/A of NCLDXC1MG256M32 to N/A on all platforms. Add note [17].	2023.04.07
2.57	Add some supporting messages, modify note[14] and part of HYNIX NANYA KINGSTON product to S/A, change T/A of BWSR8X32H2A-32G-X to N/A.	2023.11.22
2.58	Add some supporting messages	2023.12.05
2.59	Add some supporting messages,modify S/A of NT6AN512T32AV, T/A of RS1G32LF4D2BDS-53BT,K3LKCKC0BM-MG** to N/A.	2024.04.23
2.60	Add some supporting messages,modify N/A of K3LKCKC0BM-MG** to T/A.	2024.04.30
2.62	Add some supporting messages	2024.09.03
2.63	Modify T/A of NT6AP512T32BL on RK3568/3562/3566 to N/A.	2024.09.05
2.64	Add some supporting messages, modify T/A of CXDQ3BFAM-CQ-A,CXDQ3BFAM-CJ-A,CXDQ3BFAM-IJ-A to S/A.	2024.11.28
2.65	Add some supporting messages, modify T/A of IS43QR16256B-083RBLI,NT5AD512M16C4,A3F8GH40BBF-MC,N2AD8G16C4-JR,D5116AN9CXGXN to N/A.	2025.03.17
3.00	Add some supporting messages, delete RK290x RK2918, modify T/A of W66DP2RQQA*J to N/A.	2025.08.08

See Infocenter, <https://redmine.rock-chips.com/documents/49>, for access to the latest support list.

Conducted by the Manufacturer

NOTICE

1. This part was tested and validated only by the DRAM manufacturer,not by Rockchip.
2. If you encounter any DRAM issues during product usage, please contact the DRAM manufacturer for assistance
3. Rockchip strongly advises conducting a comprehensive Production Verification Test (PVT) prior to mass production to ensure product conformance and reliability.
